MITEL 3000 Communications System (CS) The Complete Communications Solution for Your RESIDENCE

Imagine your residence with a single system that can manage a complete range of converged voice

and data requirements over a single network, while offering the feature-rich phone solution that meets the needs of your busy household. Now you can enhance your communications at home with the right system, the first time, with Mitel® 3000 Communications System.

The Mitel 3000 Communications System Residential Solution Offers:

- Progressive telephone system with all the features and functionality of a traditional multi-line voice solution.
- Host of leading-edge standards that will offer voice and data connectivity.
- Add additional lines, phones and services as you need them without having to replace your entire phone system.
- The ability to connect existing analog equipment including fax, cordless telephones and more.
- Stay connected when traveling by connecting to your home system via the Internet with an IP-based system phone. Get all your calls, voice mails and have access to all the system features from anywhere in the world.
- Reduce monthly call charges with flat rate long distance service plans.

Mitel 3000 for Residential

Provide electric gate release from any phone in your house.

Enhance your telephone system with hearing aid compatible telephones.

By leveraging the powerful features of the Mitel 3000 Communications System, you can:

- Use the speaker phone for hands-free calls.
- Use Do-Not-Disturb options to avoid nuisance calls.
- Use the intercom or paging features to reach other family members throughout the house.
- Automatically route calls to specific phones with the Caller ID detection feature.
- Provide everyone in your house with their very own voice mailbox.
- Set up individual lines for family members.
- Use the speakerphone available on Mitel 3000 Communications System telephones for hands-free calls.
- Conduct joint conversations on a single line.
- Reduce expenses with Unified Communications, which incorporates Unified Messaging, Click to Dial and the Mitel 5110 Softphone.

Set up restrictions to control when your children can have use of their phone and who they are permitted to call.

Add wireless phones to extend your access to the yard or pool.

Stay connected to your home-based business from anywhere in the world with the IP-based system phone connected to the Internet.

Utilize the same valuable features for your home-based business or while telecommuting:

- Utilize the auto attendant for professional greetings and call processing.
- Set call forwarding to cell phones so you don't miss the call you've been waiting for.
- Conduct 3-way conference calls.
- Connect your Mitel 3000 Communications System at the office with your IP-based system phone at home for full feature access.
- Augment your system with multi-device options such as a fax machine or credit card machine.
- Record calls using the Record-A-Call feature so you can capture important information.
- Utilize the remote notification feature to be alerted to new voice mail messages.

Place phones in your guest house, garage or other free-standing facilities on your property.
